Tools: Jira, Confluence, SQL, Power BI, Postman, Excel, Azure Custom Vision, Wireframing, BRD, SRS Documentation, POCs

Experience

Capgemini Jun 2021 – Present

Associate Product Manager / Associate Consultant Jan 2025 – Present

Project: Astrum Credit Card Application — Rogers Bank Bengaluru, India

- Owned product requirements, roadmap planning, backlog prioritisation, sprint planning, release planning, and stakeholder alignment for an AI-enabled fintech onboarding platform.
- Owned PRDs, user stories, acceptance criteria and release planning for onboarding workflows.
- Improved feature release velocity by 20% through Jira backlog optimisation, sprint planning improvements, and cross-functional collaboration across product, engineering, QA, and operations teams.
- Reduced requirement clarification cycles by 30% through structured documentation, stakeholder workshops, customer feedback analysis, and prioritised product discovery.
- Reduced digital onboarding drop-offs by 35% through integrations with InstaCredit, eSignature, automated identity verification, and real-time eligibility decisioning workflows.

Senior Analyst Jan 2023 – Dec 2024

Project: Disney Onsite Residence Management System (DORMS) Bengaluru, India

- Improved customer retention by 15% through data-backed feature prioritisation, customer research, user persona definition, and customer journey improvements.
- Conducted 20+ customer and stakeholder interviews to identify pain points, validate requirements, and prioritise roadmap initiatives.
- Managed backlog refinement, sprint execution, UAT coordination, release planning, stakeholder communication, and post-launch RCA-driven product improvements.
- Collaborated with engineering, QA, operations, and business teams to improve delivery predictability, release quality, and customer experience.

Analyst

Project: Media Broker Content Management Platform

Jun 2021 – Dec 2022

Mumbai, India

- Managed requirements across 15+ stakeholders spanning product, engineering, QA, and operations teams.
- Improved system response time by 30% by defining and delivering API-driven platform enhancements using Java Spring Boot, REST APIs, and microservice-based architectures.
- Accelerated stakeholder alignment and feature approval rates by 60% by converting business requirements into wireframes, SRS documentation, workflow diagrams, and POCs.
- Reduced defect rates by 40% through workflow optimisation, UI/UX improvements, API modernisation, validation improvements, and REST-to-SOAP transition initiatives.
- Drove product requirements for secure and scalable media workflows involving AWS Cognito, AWS S3, cloud integrations, access control, and content management workflows.

Additional Product Experience

Islington Robotica

Associate Product Manager

Jan 2021 – Jun 2021

Remote / London Area

- Drove product discovery, MVP definition, roadmap planning, and feature prioritisation for an AI-powered sports analytics platform.
- Defined computer vision product requirements alongside founders and AI/ML engineers, shaping the platform's 0-to-1 product roadmap.
- Built Power BI dashboards tracking 10+ product KPIs, feature adoption trends, and user engagement metrics to support roadmap decisions.

LAHOL Foundation / Non-Profit Product Initiative

Associate Product Manager

Concurrent Engagement

Remote

- Secured INR 3 Lakhs in funding through stakeholder engagement, proposal development, and program coordination.
- Owned digital growth initiatives for the organisation's business arm, including campaign planning, social media strategy, content execution, and performance tracking.
- Generated 50K+ total content views across social media campaigns, improving awareness, audience engagement, and community reach.

Early Experience

TAGPAY Limited

Business Analyst Intern

Jun 2020 – Nov 2020

London, United Kingdom

- Built interactive Power BI dashboards by transforming, modelling, and visualising legacy sports data for analytics, reporting, and product insight use cases.
- Developed and trained computer vision models using Microsoft Azure Custom Vision to enable AI-driven real-time object detection in football analytics.

Education

Lovely Professional University

Master of Computer Applications, Computer Science

2019 – 2021

Jaipur National University

Bachelor of Computer Applications, Computer Science

2016 – 2019

Certifications

- Certified Scrum Master (CSM) – Scrum Alliance (2025)
- Microsoft AI Product Manager Professional Certificate – Coursera (2025)
- Delivery Excellence Award – Capgemini (2024)
- Agile Software Development – Coursera (2024)
